

111 Peyton Ave.,
Haddonfield, N.J.

Dear Mrs. Wardell,

I hope you will forgive this much delayed "Thank You" for your kindness in sending me the copies of newsletters of the Allendale Historical Society way back in February. It was my intention to write you immediately but for some reason I put it aside in a file and then could not find it.

It is a very great pleasure to be a member of the Allendale Historical Society. Allendale has always seemed like more of a home town than any other place I have lived.

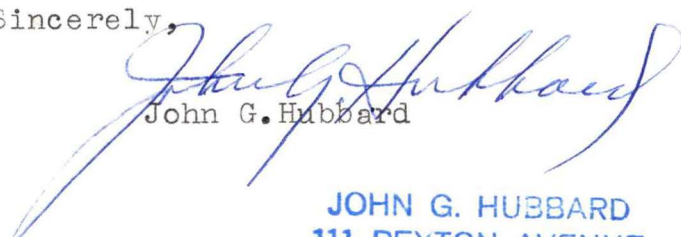

In looking over some old books I have I discovered two note books, some what like diaries, that I kept while I was Post Commander of Post 204 in 1929. Among other papers there was a rough copy of the census that the Post took of the town during that year. There are also some pictures that may be interesting. I will gradually collect them and send them to you if you think they have any value.

The newsletters are extremely interesting. Especially the one about the Appert farm. That was my playground for many years and the brook leading down along the turnpike was where we used to get our pickerel belly bait to capture the big ones over in Mallinsons pond before it became the swimming pool.

I guess my sister Mary got a little twisted because I notice that you use an address in Moorestown. That is where my brother lived before his death in 1973. The zip code was correct so everything has arrived. I will put my address stamp below so you will have it correctly.

Again thanks a lot for the newsletters.

Sincerely,

John G. Hubbard
